

SATURDAY MAY 25, 1889

BREVITY.

For the best hay and grain at reasonable prices, go to J. J. Ivanovich.

What has become of the proposition to celebrate the coming 4th of July in Tucson?

Furniture dealers are having a good trade in cots. The season for sleeping out doors has arrived.

Many improvements have been made during the last six months on the convent, Meyer and Mesilla streets. Tucson is growing.

The G. A. R. will turn out in a body on next Sunday evening to listen to a memorial sermon by Rev. H. Hammond Cole at the Congregational church.

A request has been made by the committee of arrangements for the military band and a firing troop, to take part in the exercises inaugurated for Memorial Day in Tucson by Negley Post, G. A. R.

A lady of Tucson upon her remarkable recently that she would soon marry an Indian as a man who does not make Sam Drackman's cigar. We think the lady is correct in her remarks.

Col. Durr is having a number of new signs painted on the side of his place of business fronting on Meyer street. He has an attractive place and will not fail to attract the attention of all who pass his way.

Mr. J. S. Mansfield is suffering much pain from rheumatism and had to leave his business and go home this morning. He had intended to visit the school today and witness the examinations going on, but was unable to do so.

Mr. and Mrs. C. H. Warren and Miss Warren, accompanied by Mrs. Bixley, a relative, who has been visiting with them during the winter, will leave tonight for Boston, to remain in the hot weather, visiting relatives and friends there.

Mr. Ed Spofford has the walls of his new residence on the opposite side of the track from the depot completed, and the roof is now being put in position. Mr. Trayer has also secured a lot in the same neighborhood and will erect a building at an early day.

Mr. Roy Stahl was married to Miss Clara Foster, daughter of Mr. George Foster, city tax collector, at the residence of Mr. Frank Proctor by Justice C. H. Meyer. The ceremony extends congratulations to the newly wedded couple.

The fireman's ball given last week for the benefit of raising funds to put a fence around the cemetery owned by them was a fair success. The committee have all the reports, and the expenses have all been paid, leaving sufficient money to erect a very good fence.

Hon. H. R. Jeffords is in Tombstone attending to the Rittter case. Rittter was the defaulting treasurer of Cochise County, and his bondsmen having tired of paying up his shortcomings, engaged Messrs. Jeffords and Franklin of this city to take their case and make the best of it. Mr. Jeffords expects to be away about four days.

The Tucson sampling works has done a much larger business this year than for the last three or four, which is the best evidence that the mining industry in this section is getting better. Yesterday Mr. Worre received seven tons of ore from the Matchless mine, and twelve tons were received the day before from the Silver mine.

To-morrow will be the last day of public school for this scholastic year. The examinations were completed in all the grades to-day, and to-morrow will be devoted to rehearsing for the entertainment to be given at the opera house in the evening by the pupils. Parents and citizens generally should attend the exhibition at the opera house, and give the children encouragement by doing so.

Hon. Jas. D. Griffin, judge of the eighth judicial district of Iowa, says: "It gives me pleasure to recommend Chamberlain's Remedy, because I do so from actual experience of the use of them in my family. I prefer particularly Chamberlain's Cough Remedy, which I think unequalled by any other." Sold by Fred Fleishman & Co.

"Cyclone Bill" had an examination today for supposed complicity in the Wham robbery, before Court Commissioner Hughes. Private Hammon, a colored soldier, who was shot through the arm, swore positively to having seen the "Cyclone" walk from behind the restaurant to a cedar tree about 100 yards distant. He said that on account of the man's lameness that he had believed him to have been wounded. On the identity question nothing could shake his testimony. The examination was in progress as the CITIZEN goes to press.

The Journal-Miner says that Justice Wright is well-up in his work on the cases now pending in the supreme court. The opinion of the court is being written in all the cases except the following: The Santa Rita Land and Mining Co. vs. T. Lillie Mercer; Ruff vs. J. B. Leland; Bresh vs. J. B. Leland. He is now studying these cases, and the opinion will be prepared for delivery within a brief time.

The San Francisco Examiner grows facetious at the expense of the good people of this law-shedding burg, whom it editorially charges as being the robbers and assassins of Major Wham. This species of Democratic pleasantry may be edifying to the writer of said editorial and a few of his kind, but it is a base and malicious slander on the citizens of Tucson. It is reported that the editor of that paper who recently visited Tucson in the interest of his "watch-og" and the paper endeavors to even up the little score by gross and willful misrepresentation. Such a thing is possible only by a silly fool who never saw the town.

Hotel Arrivals.

San Xavier.—Joseph H. Kibbey, E. Hadley, Florence; J. C. Pascoe, Phoenix; J. N. Johnson, Colorado; Tex; H. J. Maerles, St. Louis; E. M. Hailton, Nogales; Geo. B. Lee, Socorro.

Comopolitan.—J. D. Burgess, Mountain; N. M. Peak, San Francisco; C. M. Marshall, L. English, Casa Grande; Mrs. C. B. Stocking, Thomas.

Pre-Historic Arizona.

An eight-page supplement, published in Harper's Weekly, May 15th, contains a double page of illustrations and diagrams drawn by Harry Fenn to accompany Richard J. Hinton's article entitled "The Great House of Montezuma." Other timely and interesting reading matter profusely illustrated. Twenty-four pages with cover 10 cents. For sale by booksellers and news dealers. Subscription \$4.00 a year.

A Baseball Victory.

Ralph Staples, first baseman for the Greenstockings, and Maud Deen, a dining room girl at the Reynolds House, bought a twentieth ticket in the Louisiana State Lottery, in partnership, and last Tuesday's drawing got \$15,000, or \$7,500 each.—South Bend (Ind.) Times, April 19.

Depot Beer Garden.

New open for the season. A first class saloon in connection, where choice wines, liquors and cigars may be had. Picnics, four kinds of cheese, ham and sandwiches, and all manner of lunches served at all hours. Opposite depot. Goods room, lodging 25 cents. Geo. Seccoon, Prop'r.

Silver Reef Mining Camp.

May 19th, 1889

ED CITIZEN: Your correspondent while sitting on the roof overlooking the Silver Reef mine, feels inclined to record a few items respecting this camp. It is the most romantic spot I have seen since leaving Montana, for landscapes. Before some twelve miles north in the valley, lies the bustling little railroad town of Casa Grande. On either side for miles and stretching as far as the eye can reach is a level valley, where once multitudes dwelt and tilled the soil on a large scale. Of thousands of happy homes nothing remains to mark the spot of habitation but mounds covered with pottery, and as I watch the blue smoke ascending heavenward from an engine on the Southern Pacific railroad pulling a long freight train into Casa Grande, I am forcibly reminded that tide and time await for no man.

Looking beneath my very feet and within a stones-throw I see a group of busy humanity toiling away with picks, shovels and wheelbarrows; just above me I see a hoisting machine puffing away from its perch on a tall iron pole, bucket shoots from the shaft loaded with bright, gleaming metal, which by ingeniously arranged machinery is dumped in a car and carried to the dump while the ore bucket returns into the shaft for another load. All this seems a dream to one who has watched the gradual changes wrought by the hand of progress in Arizona during the past 15 years.

But I must be brief as time is money hereabouts. At this very moment I hear the rambling of a blasting being fired. Now I hear the bell ringing in the shaft house, and now the dinner gong at the large boarding house. In an instant the bright iron ore bucket shoots from the shaft loaded with bright, gleaming metal, which by ingeniously arranged machinery is dumped in a car and carried to the dump while the ore bucket returns into the shaft for another load. All this seems a dream to one who has watched the gradual changes wrought by the hand of progress in Arizona during the past 15 years.

Good roads are graded to the mines and mill site, large dumps of ore, containing hundreds of feet deep. All this has proved the falsity of the predictions made from time to time by ignorant prognosticators that the district played out a few feet from the surface. Judging from the results attained by the Central Company, who I am told are now in the process of mining, Mr. Trayer has also secured a lot in the same neighborhood and will erect a building at an early day.

Mr. Roy Stahl was married to Miss Clara Foster, daughter of Mr. George Foster, city tax collector, at the residence of Mr. Frank Proctor by Justice C. H. Meyer. The ceremony extends congratulations to the newly wedded couple.

The fireman's ball given last week for the benefit of raising funds to put a fence around the cemetery owned by them was a fair success. The committee have all the reports, and the expenses have all been paid, leaving sufficient money to erect a very good fence.

FROM THE MINES.

The Weekly Report on the Tombstone Properties—Mexican Mines and Miners—Other Items.

TOMBSTONE WEEKLY REPORT.

The Prospector says: In this immediate part of the country, the most important happening during the week was the starting and successful operation of the DIAMOND DRILL.

At the new mill, 18 feet had been made in the well during the last 12 hours run. This is a very important introduction into the mining circles of Tombstone and its importance will soon be shown by its practical operations.

Still sinking good ore, ledge continues down in a solid form no breaks or faults being encountered. It is the intention of the owners to sink and cut stations about 100 feet apart before running any extensive drifts.

The ore taken from this mine and the Silver Plume is about evenly divided. The free milling ore goes to the mill on the river which runs down the dip the time while the laser or smelting ore goes to El Paso.

Work of moving the ore house progresses rapidly and will probably be completed during the coming week. The facilities for the economical and rapid working of the mine will be increased. All of the ore as well as the waste will be hoisted through the new shaft.

The same old story, plenty of ore in sight. Mines never looked better. Thousands of tons of ore are being mined that will not be raised to the surface till something happens which we are not supposed to know till it happens.

Mr. Severance is going to work as though he meant business. The much water pipes have been laid to the mine and preparations being made are indicative of the intention of the management to go to work before letting any more news and rumors.

The Mexicans are good miners and can mine and beneficiate their ore cheaply and well. They have been working their mines for 300 years or more, treating mainly the free-milling ore. In many places they have worked the ore by open cuts as far down as free milling ore existed and then left them. About 25 miles from Sombriero is one of these open cuts, which is from 15 to 20 miles in length. As far as raising ore is concerned they can do it as cheaply by hand as we do by steam in many cases. They carry all ore out in sacks, the other ore in wagons. The first is a real business man, but it is overgrown by his impetuosity. The family trait for generations has been precision in business affairs, with New England parsimony.

It is well said that the Mexicans are good miners and can mine and beneficiate their ore cheaply and well. Fence Districts.

OFFICE OF THE BOARD OF SUPERVISORS, PIMA COUNTY, ARIZONA TERRITORY, Tuesday, May 14, 1889.

The board met pursuant to call of Chairman H. E. Lacy, for a special meeting, the same having been adjourned from May 13, 1889, to act upon and consider the requirements of an Act entitled "An Act to Regulate Lawful Fences and Trespass within the Same," Approved March 19, 1889.

Present: H. E. Lacy, Chairman, F. L. Proctor and George A. Alderson, members, and M. S. Snyder, Clerk pro tem.

Upon motion of F. L. Proctor, duly seconded, put and carried, all members voting aye, it was ordered:

First: There shall be one "Fence District" within the county of Pima, which said District shall include and be comprised of the entire county of Pima, aforesaid, and shall be bounded and described by the same boundary lines and stakes as said county.

Second:—Said Fence District shall be numbered No. 1.

Third:—Within said Fence District No. 1, all persons desiring protection for crops, vegetables, or other agricultural growths or property from stock, shall make the same with a lawful fence.

On motion duly seconded it was ordered that a copy of the above proceedings be published in the Daily Citizen and Daily Star for four successive weeks, and

ATTEST: H. E. LACY, Chairman.

M. S. SNYDER, Clerk pro tem.

Memorial Day.

Negley Post, No. 1, Department of Arizona, G. A. R. extends to all soldiers and sailors, Sons of Veterans, "Boys in Gray," the different societies, etc., a cordial invitation to join with them in the observance of Memorial Day, May 30, 1889.

Horses for Sale.

If any one needs horses, apply to L. Carrillo, 209 Main street, or to either side, sell them as may be desired. I wish

DOCTORING IN THE DARK.

No sensible surgeon will attempt the performance of an operation involving human life in a room secluded from the proper amount of light. A practitioner will not attempt the diagnosis of a complicated disease unless he can see the sufferer and make an examination upon which to base his opinion relative to the course of treatment necessary to bring about a complete restoration of health.

Notwithstanding the impropriety of such action the doctor seems to be a great deal of doctoring done in the dark. By this it is not intended that a literal meaning be inferred, but that a great many diseases are committed because of the darkness which is the result of ignorance. It needs no illustration to demonstrate that gross ignorance has caused many fatal mistakes to be made in the treatment of diseases by those who profess to be learned in the art of healing.

In many diseases several organs are more or less implicated and what seems a primary ailment may be one quite remote. For instance, a severe headache may have its origin in a disturbed stomach. On the other hand, a disturbance of the stomach may be caused by a blow on the head. The seat of typhoid fever is in the upper part of the bowels, but most of the worst symptoms are often in the brain.

Symptoms of disease as well as diseases themselves are oftentimes followers or indications of some unsuspected organ disease and this is particularly true of lung, liver, brain and heart diseases in general, for it is now known that they are the result of kidney disease, which shows its presence in some such indirect manner.

Several years ago a gentleman became convinced of the truth of this and through his efforts the world has been warned of kidney disease and as a result of continued effort a specific known as Warner's Safe Cure was discovered, the general use of which has been found to be an inestimable benefit in all cases where kidney treatment is desirable or necessary.

When consumption is threatened as is the case of the kidneys, it is immediately inquired into and if they are found diseased, cure them by an immediate use of Warner's Safe Cure and the symptoms of lung decay will rapidly disappear.

There are too many instances already recorded of the terrible results produced by a lack of knowledge concerning the cause of disease, and human life is too much importance to be foolishly sacrificed to bigotry or ignorance.

A Plea for Politicians. Oddity is, therefore, the designation of a distinguished element among men, and it is avoided only as it is of the character of a man who is from 15 to 20 miles in length. As far as raising ore is concerned they can do it as cheaply by hand as we do by steam in many cases. They carry all ore out in sacks, the other ore in wagons. The first is a real business man, but it is overgrown by his impetuosity. The family trait for generations has been precision in business affairs, with New England parsimony.

They carry all ore out in sacks, the other ore in wagons. The first is a real business man, but it is overgrown by his impetuosity. The family trait for generations has been precision in business affairs, with New England parsimony.

It is well said that the Mexicans are good miners and can mine and beneficiate their ore cheaply and well. They have been working their mines for 300 years or more, treating mainly the free-milling ore. In many places they have worked the ore by open cuts as far down as free milling ore existed and then left them. About 25 miles from Sombriero is one of these open cuts, which is from 15 to 20 miles in length. As far as raising ore is concerned they can do it as cheaply by hand as we do by steam in many cases. They carry all ore out in sacks, the other ore in wagons. The first is a real business man, but it is overgrown by his impetuosity. The family trait for generations has been precision in business affairs, with New England parsimony.
